One weakness is that the board cannot be rotated. If the player wishes to take the side of Black (the Blue pieces in the game), this means playing down the board against White (the Red pieces) playing upwards. Conservative chess players may choke at this offbeat approach, but it turns out to be quite entertaining for beginners and quite challenging for intermediates.

Although the animations tend to be a little stilted with noticeable movement gaps between frames, the substance of the animations makes up for that. The character portraits have an impressive amount of detail, including little things like wrinkles in clothing and facial expressions. Battle Chess's producer Brian Fargo expressed his fondness for the game in a 2006 interview, although he added that he did not think there would be much of an audience for it today. Digitized sound is utilized in the DOS version for all battle sound effects and is played through the PC speaker, without the need for a sound card, using a technique akin to RealSound.
