For anyone wondering what is actually in this OST:

1. Blender Theme
2. Boss Theme
3. Briefing Theme
4. End Theme
5. Level 1 Theme
6. Level 2 Theme
7. Level 3 Theme
8. Lose Theme
9. Main Theme

Since the base game has to be bought to buy this, I can't even begin to describe why this should be bought. It's obvious that if you like the music, you'll want this. If not, then don't get it, I guess? :)

I like about two tracks from the game and the fact it's reasonably price at \$1 makes it an easy decision. I do wish to warn others that the game soundtrack is of lower quality than the DLC and honestly, I like the game sound more. It has almost a Sega Genesis vibe I dig and was the initial reason I was interested in the game.
